

M-TEC  
Livestock Range

# M-TEC SHEEP DECKS

Our M-TEC livestock trailer features a unique ramp system that provides maximum space while requiring minimal effort. When not in use, the decks are held securely at the front and sides of the trailer.

The ramp can be locked and unlocked with your foot, minimizing the need for hand use. Designed for ease, the sheep decks are user-friendly, easily assembled, and include full-length decks that fold down for convenience.

- 3.5Tonne coupling
- Parabolic suspension
- Side access doors
- Fully fitted chequered flooring
- LED lighting
- 175x75x16 Tyres
- Strong aluminium loading gates
- Interior dividing gate hangers
- Strong aluminium loading gates
- Spare wheel and bracket
- Front fold down flap
- Open side vents
- Plastic mudguards (12FT)
- Aluminium mudguards (14FT)
- Sheep dividing gate

## Anti Slip Covered Sheep Deck Door

One common concern during livestock loading is the shine on the metal ramps which can make animals hesitant and loading more difficult.

The anti slip covered tail door option provides better grip, reducing glare and improving safety for both livestock and handlers.

### STANDARD FEATURES

- Strong aluminium loading gates
- Spare wheel and bracket
- Front fold down flap
- Open side vents
- Plastic mudguards (Twin Axle)
- Aluminium mudguards (Tri Axle)
- 175x75x16 Tyres
- 3.5Tonne coupling
- Parabolic suspension
- Side access doors
- Fully fitted chequered flooring
- LED lighting

### OPTIONAL EXTRAS

- Dividing gate
- Dividing gate hanger
- Effluent tank
- Closed vents
- Top and bottom side vent flaps
- Bottom vent rail
- Interior light
- Aluminium mudguards (Twin Axle)
- M-TEC Safety bar
- Halter rings
- Black roof
- Rubber Flooring
- Rubber tail door
- Trailer wrapping
- Personalised mudflap
- Interior & Exterior Cameras
- Colour coded mudguards
- Wind Breaker

### Livestock Features

M-TEC livestock trailers are manufactured for durability and strength, featuring additional elements that set them apart from the competition.

- The chassis layout uses box iron instead of angle iron for increased strength, reducing flex and movement which can cause fatigue in the steel and weaken the structure.
- Spring hangers connected to the box iron ensure stability while turning the trailer with a full livestock load.
- LED lighting is linked via a wiring loom which eliminates junction boxes that are prone to failure in adverse weather.
- Knott running gear, known as the best auto-reverse mechanism in the market, is utilised through the M-TEC range.
- Folded aluminium sides provide extra strength at a critical trailer point.
- Sturdy rear posts and robust aluminium loading gates enhance longevity, with integrated LED lighting positioned to avoid damage.
- Slam Shut dividing gates offer adjustable positions for flexibility.
- A black roof option is available across the livestock range, with a unique feature allowing for easy replacement if damaged.
- An effluent tank with removable lid facilitates thorough cleaning.

*The M-TEC livestock range combines strength, durability and visual appeal in its trailers.*
